CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his perat H. Ilitcher: sonal supervision since its infancy.
Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children-Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregorie, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the each and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

The Kind You Have Always Bought In Use For Over 30 Years.

D. C. SNYDER, ple persist in believing that the breast-works thrown up by General Jackson at New Orleans were made of cotton REAL ESTATE AGENT,

Berryville, Clarke County. Virginia. Buy, Sell and Rent Farms, Lots and Mouses.

NEGOTIATE LOANS ON REAL ESTATE

Clarke county lies at the head of the noted Shenandoah Valley. Jefferson county, West Virginia, is its northern boundary, the Blue Ridge Mountains form its eartern boundary, dividing it from Loudoun and Fauquier counties. Warren county is on the south and Frederick on the west. The Shenandoah river flows through the eastern part of the county, at the foot of the Blue Ridge. In aggregate agricultural wealth Clarke county is probably the richest county in the state. The exhaustless fertility of her soil, the healthfulness of her climate, and the beauty of her diversified landssape, are subjects that charm the toogue and admiration of all who have ever visited this county. The surface of the main part af the county is gently undulating—just sufficiently for drainage. The soil is limestone and peculiarly adapted to the growth of wheat and corn, clover and timothy. Blue grass is indigenous, and soon forms on uncultivated fields a sod equal to the far-famed fields of Kentacky. Large numbers of cattle, sheep and hogs are grazed and fed, and sold in Baltimore, Philadelphia and New York markets, and many fine horses sold to city buyers.

Good roads traverse the county in every direction, and four macadamized turnpikes cen-Good roads traverse the county in every direction, and four macadamized turnpikes center at Berryville, the county-seat, which contains a population of about 1500. Pure mountain water from the top of the Blue Ridge s piped into the town by the gravity system and the town is lighted by Acetyline Gas. There are eight churches in the town, and good private and public schools—school houses supported by county and state being located at convenient points all over the county. Taxation at a cash valuation of property is about \$1 on the \$100 for all purposes—State, county schools and roads.

The Shenandoah Valley division of the Norfolk and Western Railroad extends through the center of the county, affording ready means of travel or shipments of products either north or south Besides this railroad, the Southern Railroad from Washington and Alexandria with terminus at Bluemont, eight miles from Berryville, runs 3 trains daily to and from Washington. We are expecting at no distant day the extension of this road from

and from Washington. We are expecting at no distant day the extension of this road from Bluemont, which will cross the county from east to west, placing us within 60 miles of the

national capital.

For reasons best known to owners I do not advertise many of the most desirable properties I have for sale, but if parties desiring to buy will send me a description of the kind and size of farm wanted, it will prove a guide in selecting from my list—or enable me to negotiate a purchase for them. Should applicants by letter, or parties coming here, be unable to suit themselves, and desire to look around at properties in the adjoining counties of Frederick, Warren, Loudoun or Jefferson, I will be pleased to accompany them, or to give them letters of introduction to real estate agents in those counties with whom I have reciprocal relations.

To Land Buyers.

i request, as a matter of courtesy, that after I have introduced you to the owner of real estate through my advertisement or otherwise, and you have determined to purchase, that you will close the contract through me, so that my commission will be secured.

PARTIAL LIST OF FARMS 430 Acars—On Shenandoah river, 3½ miles from railroad station, post-office and store—s miles from Berryville; turnpike half the way. Large comfortable dwelling house and tenant house, barn and stabling for ten horses; two large granaries with hay-mow above. Fencing good; 75 acres of timber; 150 acres of river bottom. Lake of clear water near arn and house stocked with fish. Good land and a good investment for money, paying an annual cash rent of \$750. Long time will be given on deferred payments. Price \$12,000. 196 Acres-First quality limestone land, near to town and turnpike road. Modern built handsome dwelling, on elevated site, barn, outbuildings, good orchard, ruthrough the farm, spring and well of good water. A nice, cheerful situation. 228 Acres—Nice, smooth land, one half mile from turnpike, two and half miles to post-office. Brick house, desirable neighborhood, running water. Price, \$65. an acre.

80 Acres-A desirable small farm. House of 6 rooms; good orchard. \$4000. 182 Acres-No. 1 farm, near post-office, stores and depot. Large stone Mansion, large barns, spring and running water, fencing good. 100 Acres.—This is one of the best producing, best located and desirable small farms in the county. Fairly good house, good orchard, well and running water. \$10,000.

144 Acres-Near turnpike; new house, barn, well, orchard. \$6,750. 600 Acass-Three miles from Millwood on east side of Shenandoah river; 100 acres river ottom and most of the upland good limestone land. Improvements fail 225 Acres Very desirable and well improved farm, located on turnpike at depot, store, ear churches and school house—plenty of pure spring water. \$18,000

325 ACRES-A first class farm. \$25,000. 287 Acres-Large brick house, barn, spring, orchard. \$50 an acre. 120 Acres-Well improved and especially suited for fruit. \$4,500. 168 Acres -18 acres in timber, good land and well improved. \$50 an acre.

312 Acres 30 acres in timber, running water. Fairly well improved. \$65 an acre. 428 ACRES-75 acres in cultivation. Nice brick dwelling of 10 rooms, good outbuildings. \$8,500. 347 Acres-35 in good timber, good house, large barn, orchard, water. \$27,000. 391 Acres-Good dwelling and barn, running water. \$65 an acre.

283 Acres-A No. 1 farm in every respect. House cost \$16,000. One mile from first 370 Acres -50 acres in timber, large orchard, fair improvements. \$50 an acre.

I have several good business and residence properties in Berryville for sale. Parties wanting a home or desirous of engaging in business in the town, would find it to their interest to confer with me.

Mrs. Malinda Akers, of Basham, Va,, writes: "I had what doctors call 'prolapse,' and couldn't stand straight. I had pain in my back and shoulders, and was very irregular and profuse. Doctors said an operation was needed, but I couldn't bear the thought of the knife. After taking three bottles of Wine of Cardui, I could walk around. Can now do my housework and am in splendid health."

Cardui is a pure, vegetable, medicinal essence, especially adapted to cure women's diseases. It relieves excessive periodical pains, regulates

irregularities, and is a safe, pleasant and reliable remedy for all sick women. In successful use for over 70 years. Try it.

FREE ADVICE Write us a letter describing all your symptoms, and we will send you free Advice, in plain sealed envelope. Address: Ladies' Advisory Department, The Chattanooga Medicine Co., Chattanooga, Tenn.

FICTION IN HISTORY

AMERICAN RECORDS IN PARTICULAR ABOUND IN ERRORS.

For Instance, There Were No Cotton

The most valuable book in the British museum is the "Codex Alexandriaus," said to be worth £300,000.

Sword to Washington at Yorktown. perhaps known to few peop't. That American history particularly abounds in errors, blunders and stereotyped fedsities is known to even a smaller number. Walpole, wishing to amuse his father after an unusually wearisome day, proposed reading to him from a book of history. "Anything but

history," said the old man, "for history must be false." When it is considered that historians in every period of the world have been narrowed and blased by personal opinion and surrounding circumstances the wisdom of this remark is perceived. The worst part of it all is that when once a mistake has been made it has rarely been rectified, each succeeding historian being content to accept as facts the work of those who went before him. The ultimate result of this was that the mistakes were believed by those who read them, and events in history that never happened or were false were accepted by the world and

important epochs. For instance, the battle of Lexington, which occurred April 19, 1775, is known as the first battle between the colonists and the British. But this was not so, for the records of Orange county, N. C., show that on the road from Hillsboro to Salisbury on May 16, 1771, an engagement between a squad of British troops and a body of colonists took place, in which thirtysix men were killed and several wounded. The trouble was caused by the resentment of the colonists over the illegal taxes imposed by the British clerk

of the county court. Historians persist in saying and people persist in believing that the breastbales covered with earth. As a matter of fact, there was not a pound of cotton on the ground, and this fact has been verified by Major Chotard, General Jackson's assistant adjutant gener- its good qualities under favorable ciral, who was himself a participant in the battle.

A well known engraving that nearly comparatively slow process, which exalways appears in modern school histories is that of General Cornwallis handing his sword to General Washington will be as good as ever after a prolongat the surrender of Yorktown, and this ed rest. But recovery will take place in spite of the fact that, to spare Cornwallis the humiliation, General O'Hara warmed, so that a few minutes' expogave his sword to General Lincoln in token of surrender.

Possibly in the course of time the battle of Bunker Hill will be rightly called the lattle of Breed's Hill, and, to return to ancient history, the marvelous chronicles of Herodotus will be discredited. It is told in history that Hannibal cut his way across the Alps with fron, fire and vinegar, but the question still remains as to how he applied the vinegar. The conflicting accounts of the life of Napoleon go to illustrate the discrepancies of many historical writers.

Ail have heard the words, "Ail is lost was not to be found there.

And, again, when Louis XVI, laid his Louis, ascend to beaven." Yet in reallty he said nothing of the sort.

The brave defiance, "The guard dies, or, as it has been corrupted, "God is on the side with the heaviest artillery," quietly behind her. which has been attributed to Napoleon, really originated with writers of antiquity. Cicero alludes to it as an "old proverb.

ferent, that historians have made, and the lamentable part of it is that the old blunders are constantly being made over again, so that, with the errors that are bound to occur in the takes that our forefathers made and which we are still making, history in time will become little more than a long though extremely interesting work of fiction.-Sunday Magazine.

What We Owe to Insects. have had any more imposing or attractive flowers than those of the elm the hop and the nettle. Lord Avebury compares the work of the insect to just as the florist has by selection proden, so the in ects by selecting the largest and brightest blossoms for fermarkable experiments on the ways of insects visiting flowers. He considers | Century. that they are guided by scent rather than by color, and in this contention he is at variance with certain British naturalists. Whatever may be the attractions in flowers to insects-as yet it appears undefined-it is certain that the latter visit freely all blossoms alike. making no distinction between the large, bright colored ones and the less conspicuous blooms like those of the current, the lime, the plane tree, the nettle and the willow.

A RAZOR'S EDGE.

Results That Come From Stropping and Long Use.

Very thin is the edge of a recor blade, Its thickness has been estimated at about one half millionth of an inch. Bales at the Battle of New Orleans, bit of steel, when seen under a powerful microscope: "The extreme edge of the section is distinctly bent to one The fact that a large proportion of side. This is nearly always seen in all the history of all the world is false razor edges. The actual bend represents the effect of the last stroke on the strop which this blade has received. Now, this bending of the metal quite near the edge, minute as it is, has some very important practical consequences. If the razor be used in such a way that the bend is toward the skin there will be a tendency for the edge itself to burrow downward into the skin, instead of sliding easily over the surface and merely cutting away the projecting hairs. If, on the other hand, the blade be applied to the face in such a way that the bend of the edge is away from the skin the edge will slide much

more smoothly, with less tendency to

cut or scratch the skin, while it will

act upon the hairs in a slightly upward

direction and thus tend to pull them

tight while cutting. The direction of the bend of the edge can be regulated by the last few strokes on the strop. "This minute amount of bending undergone by the metal near the edge of a razor blade has another practical result. We all know that a piece of wire ever after known as the markers of which will quite easily stand being bent double will be broken if it be bent backward and forward many times. What really takes place is that the metal, which was strong and ductile to begin with, is gradually made hard and brittle and then finally breaks off. Now, the metal near the edge of a razor is being subjected to very similar treatment. Every turn on the strop reverses the direction of the bend near the edge, and, although the amount of bending is too slight ever to bring about actual breakage of such an elastic metal as hardened steel, it is yet sufficient to bring about a change

> used long ceases to cut well or to hold a good edge. "Now it been discovered that at its proper elastic steel which qualities by process of 'fatigue,' as it is called, .. capable of recovering cumstances. It will recover in this way if left at rest, though this is a ome useless through continued use sure to the temperature of boiling water will bring about recovery to an extent that would have required several

JOHN BRENNAN'S LIE.

Traveled Round the World and Caused Lots of Anxiety. One of the silliest lies ever told was the famous invention of Sallor Man John Brennan of Sligo. It was made out of whole cloth. There wasn't the shadow of foundation for it, but there was so much that might have been true about it that it was cabled round the world wherever men go down to the sea in ships, and for several hours it kept hundreds of people on the rack of anxiety.

About 3 o'clock on the afternoon of Oct. 14, 1891, a bulletin was posted at the New York Maritime Exchange that the City of Rome had foundered off St. Shotts, off the coast of Newfoundland. About the same time the newspaper offices got a dispatch from St. John's, N. F., saying that Sailor Man John Brennan of Silgo, Ireland, had got into the little town of Trepassy that morning from Peter's river and had declared that he was probably the only survivor of the City of Rome, which had struck on the rocks and gone down. He was in such a condition of exhaustion that nothing more could be got out of him until he had had rest and nourishment.

That story was cabled and telegraphed everywhere, and at once the newspapers began to strive for further de-The first effort was to get confirmation or denial. It was found at once that the City of Rome had sailed from New York at such a time that she must have been near St. Shotts when Brennan said she was there. That looked like confirmation. The evening papers got out extras, with lists of the passengers and crew, pictures of the ship and her history. The offices of the Anchor Line agents were crowded with persons eager for news. But there was no news. Friends of the passengers flocked about the place. The Maritime and Lloyd registers were searched for reports of other ships with names similar to that of the City of Rome. An Italian Citta di Roma was found, but when she was tracked it was found she was all right.

Then the newspapers began to prepare to send men to the scene of the wreck. Boston papers got men off for Hallfax, there to take ocean tugs for St. Shotts. All the time the telegraph and cable were worked for further news from Newfoundland. At last there came a disputch from the cable station at Cape Race to the Anchor Line agents here:

"Your City of Rome passed here on

Tuesday. All well, it said." That was all. For the next twentyfour hours the truth hustled to overtake the lie. It succeeded, but it was a hard chase. Brennan had absolutely nothing on which to go in making up his story. He couldn't have known even that the City of Rome was in New York or had sailed. He just fired in the air, and, as may happen once in ten million times, he hit the mark,

The Choir He Wanted.

John Fiske, the American historian, was an ardent lover of music and himself no mean musician. Furthermore he was extremely corpulent and Telt the hot weather painfully. He was once delivering a course of lectures at a summer school in a small city of the middle west. The heat was terrific, and adjoining the house where the lecof the torrid afternoons and evenings. old descend into the arena. Astound- him a new novel, then just becoming popular. "I think 'The Choir Invisible' is perfectly splendid, Mr. Fiske," said The historian put the book aside. "My choir in the world in which I could feel any interest at this moment would be the choir inaudible."
